EDUCATION

MS in Data Science, Analytics & Engineering (Computing & Decision Analysis), Arizona State University, Tempe, Arizona | GPA: 4.00/4 Jan 2026 - Dec 2027 (Expected)
B.Tech, Computer Science & Engineering - AI & ML, SRM Institute of Science and Technology, Chennai | CGPA: 8.65/10 Sep 2021 - May 2025

INTERNSHIP EXPERIENCE

AI Research Intern, DeepTurn Solutions Pvt. Ltd., Bengaluru, India (Remote) Jul - Aug 2026

- Carried out an internship project on analysis of gene expression time-series data with the AI Research Department.
- Applied a research-driven, detail-oriented approach to independently analyze the dataset and translate findings into clear, actionable conclusions within a fixed timeline.

Intern, SPARC Edu Tech, Inc., United States (Remote) Sep - Dec 2025

- Built Hand Raise Gesture Detection and Face Recognition models using YOLOv8 and ArcFace, integrated onto an OAK-D Lite device for real-time, on-edge inference.
- Collaborated remotely with a team to deliver project milestones on schedule.

Intern, Ntier Business Solutions Pvt. Ltd., India (Remote) Nov - Dec 2024

- Developed a Python and MySQL application for employees to log and track daily work status.

Trainee, Dithari Technologies & DISC, UAE (In-Person) Sep 2024

- Learned how the center maintains sustainability through remanufacturing and e-waste reduction.

PROJECTS

Regime-Aware Stock Model, Personal Project | Python, XGBoost, Streamlit | Live Demo

- Built a Hidden Markov Model to detect bull, bear, and volatile markets and switch strategy for each; backtested 2010–2026, it returned 18.5% a year vs. 12.9% for the S&P 500.

Flu Forecasting Dashboard, Personal Project | Python, LightGBM, Streamlit | Live Demo

- Combined SARIMA, LightGBM, and Prophet to forecast flu activity weeks ahead from CDC data, with 44% lower one-week error than the CDC baseline across 10 US regions and 5 seasons.

Text-to-SQL LLM Agent, Personal Project | Python, Gemini, Ollama, SQLite | GitHub

- Built a self-correcting agent that turns questions into SQL and runs it; tested 7 accuracy techniques on the BIRD benchmark with McNemar tests, finding only the model choice mattered (+10.5 points, $p = 0.009$).

Financial Inclusion: Predicting Underserved Regions Using Advanced Analytics, SRM IST, Chennai | Python | Jan - May 2025

- Collected and analyzed demographic and regional data to identify underserved regions and inform data-driven recommendations for financial institutions.

Real-Time Multimodal Emotion Detection Using Video and Audio Streams, SRM IST, Chennai | Python | Jun - Nov 2024

- Built a system to detect emotion from combined audio and video models for applications in healthcare, education, and beyond.

TECHNICAL SKILLS

Programming Languages: Python, C, C++ | Core CS: Data Structures & Algorithms, OOP
Machine Learning: scikit-learn, XGBoost, LightGBM, Prophet, statsmodels, YOLOv8 | LLMs: Gemini API, Ollama
Tools & Databases: Git, Docker, PySpark, Streamlit, MySQL, SQLite | Data Analysis: SQL, Pandas, NumPy
Microsoft Office: Excel, Word, PowerPoint, Outlook | Operating System: Windows

RESEARCH & ACHIEVEMENTS

“Financial Inclusion: Predicting Underserved Regions Using Advanced Analysis,” Paper Publication — presents a predictive modelling approach to detect underserved regions, with applications in banking and financial institutions.
First Prize, National Science Olympiad, School Level (2019) | Ninth Place, International Math Olympiad, School Level (2019).

LEADERSHIP & ACTIVITIES

Participated in “Experiential Learning at Dubai Silicon Oasis Authority,” The Commonwealth Youth Council, UAE (Sep 2024) — exposure to cutting-edge technologies and entrepreneurial practices.
Currently completing an online course, “SQL for Data Science,” offered by UC Davis.
Group Leader, final Computer Science project, Class XII, Bala Vidya Mandir Sr. Sec. School (2020-2021).
